## Objectives

- I'm a Naval Architect and a Marine Engineer passionate about technology, markets and the ocean. I'm always willing to learn new skills that may help me improve and challenge myself. My main goal is to try to reach the highest standard possible either studying (GPA: 8.67/10) or working (see my recommendation letters below).
- Currently, I'm open to work (or doing an internship) in a position that may allow me the option to grow in a positive environment and learn as much as I can. I'm excited to embark on new challenges and gain new skill sets.
- Alongside, I'm studying German - Ich lerne Deutsch.

## Experience

Feb 2020 **BAC Engineering Consultancy Group | ICIASA Control e Inspección** Sant Joan Despí, Barcelona

Sept 2020 *Internship at Inspection and Testing Department*

• Field surveyor and part of the team in the technical office. Main tasks: reports of non-destructive testing followed out by the company on ships, civil structures, tanks and others. 2D and 3D drawings.

• Acquired knowledge of non-destructive testing (UTM, UT, MPI, PT).

• I also became a member of the Land Surveying Department where I controlled and monitored the land surveying instruments, assuring its proper functioning and accomplishing a low percentage of instrumentation failure. Main tasks: analysing data to optimize instrument's operation and prevention on any possible breakdowns.

Feb 2017 **Manufacturas Cartrix, S.A.**

Santa Coloma de Gramenet, España

Oct 2017 *Administrative assistant*

• Controlling, organizing and administrating all the tracking documents.

• Accounting Department doing administrative tasks with the accountability software "SageContaPlus" and customer service.

Dec 2016 **UNISKI S.L.**

Barcelona, Spain

Feb 2016 *Internship SEO (Search Engine Optimization)*

• Two months experience working as SEO improving satisfactorily the Google's ranking position of the company. Working on keywords, indexed content, tags and Google Search Console (GSC).
